

NetSuite for the Contract Furniture Industry

Haworth NetSuite Connector

Overview

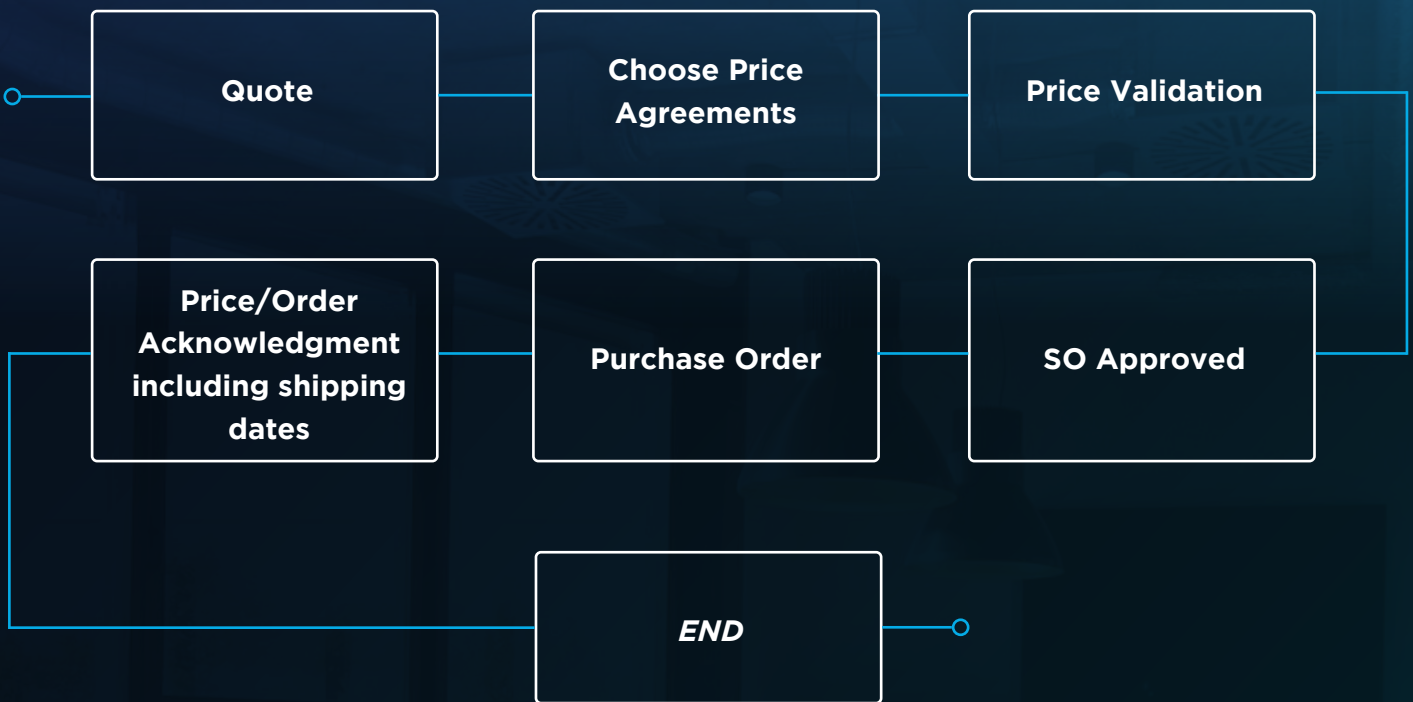

CFI Suite allows dealers to process orders in real-time with the Haworth Lynx Connector. This tool helps to boost the efficiency, productivity and effectiveness of dealers with a complete automated order processing. With the complexity of the Contract Furniture Industry, from pricing confirmation to real-time visibility on parts, Haworth NetSuite connector helps ease your processes. The Detail Mappings allow seamless sync of Entities, Transactions, Pricing Information and more from Haworth NetSuite Connector

Transactions Supported

-  Quotes
-  Purchase Order
-  Price Acknowledgment
-  Order Acknowledgment
-  Customer / Partner sync
-  Price Agreements

Haworth NetSuite Connector Approach

Once there is a Vendor Invoice created in Haworth NetSuite Connector, it is pulled in NetSuite, and automatically created.

Key Features

- Price Validation - Allowing dealers to mass update prices when there is a mismatch.
- Custom Mapping Record - Different dealers can have their own custom mapping between CFI Suite and Haworth, thus accommodating for different business models.
- Credentials Management - providing each user with unique credentials.
- Multi-Transactions Support.

CFI Suite, leverages SuiteTalk Web Services to ensure its connectors meet Industry Standards. It provides a range of approaches to build reliable and scalable integrations that extend CFI Suite into any business process, while ensuring secure data exchange.

- Standard-Based Integration
- Comprehensive Error Handling
