

Teknion Connector

for CFI Suite™

teknion

Overview

The Teknion Connector is an essential tool within CFI Suite™, designed specifically for Teknion dealers. It enables seamless communication with the Teknion manufacturer by allowing dealers to receive order acknowledgements directly. This real-time connection ensures that every order detail is accurate and up to date.

How it works

Once an order is placed, the Teknion Connector facilitates the receipt of an acknowledgement directly from Teknion. This acknowledgement includes all critical details, allowing dealers to review, approve, or reject the order information. This process minimizes errors and ensures that orders align with dealer expectations before final approval. All this data remains visible for the dealer in CFI Suite™.

Key Features

Synchronize Orders

Automatically synchronize orders between your dealership and Teknion for real-time updates.

Receive Acknowledgments

Get instant acknowledgments for your placed orders with full detailed to ensure accuracy and reliability.

Supported transactions

Purchase Orders

Efficiently manage and track purchase orders, enduring alignment with Teknion's system within CFI Suite™, for a smoother order processing experience.
